

# COLD PLANERS PRO SERIES

Heavy duty construction with front access door — All sizes come equipped with a large access door for quick inspection and easy removal of pics.

Options — The Pro series allows the planing professional to configure the planer to suit his exact needs. Options include: locator block pic holder drum, replaceable right side edge protector/skid plate, anti-chunking blade and other special configurations.

Optional water kits — Each planer has pre-drilled holes to accept optional Coneqtec/Universal water kits.

Open-drum design — The exclusive open drum design improves planer productivity by greatly reducing the power loss caused by the pics and drum passing through the already planed material. Standard planing drums lose power, particularly at depths below 1-1/2" because material is trapped between the pics and the drum. The open drum design overcomes this problem giving you increased productivity. The open drum shaft is supported on both ends by greaseable heavy duty bearings.

Two speed motor — The exclusive dual displacement motor on the pro series planer increases the productivity and flexibility of the planer for the professional user. A flip of the switch changes the displacement of the motor from high speed, for great surface finish and fast shallow cuts, to low speed with the extra torque to cut through your toughest jobs.

Center-pivot design — Planer performance is greatly improved with the center pivot design which puts the force of the skid steer directly over the cutting drum. This eliminates stress on the planer frame and the "instability & bouncing" experienced with the rear pivot or top pivot products currently on the market.

Front down design — The operation and safety of the planer is greatly enhanced by the unique front down design. This exclusive feature keeps the front of the planer low to the ground, providing a constant barrier for the debris generated by the planing operation.

Controls — Planers come with the option of either swing-away hydraulic controls or electric controls.

## Specifications

	PRO 300	PRO 400	PRO 450	PRO 600	PRO 760	PRO 800	PRO 1000
Cutting width	12"	16"	18"	24"	30"	32"	40"
Cutting depth	6"	6"	6"	6"	6"	6"	6"
Tilt capability Right or left	15°	15°	15°	15°	7 1/2°	7 1/2°	7 1/2°
Side shift travel	26-1/4" for all models						
Shipping weight (lbs)	1600	1700	1800	2000	2300	2550	2800
Minimum HYD. HP recommended	24	32	36	48	60	62	70

Flow	Hi	Hi	Hi	Hi	Hi	Hi	Hi
# Teeth	38	48	56	68	78	88	108

## Applications

Large milling projects — Your skid steer equipped with the Universal planer, is a powerful tool on your large job sites. Plane next to curbs, man holes, and other areas left behind by the large mills.

Parking lot repair — Remove large areas of deteriorating overlays with the wide planing drum without disturbing the base.

Asphalt overlay projects — The smooth power and stability of the Universal planer make easy work of key cuts at intersections and areas that require tapering or blending.

Municipal projects — Mill pot holes for long lasting repair, smooth bumps or frost heaves, and remove asphalt or concrete prior to utility work.

NOTES: Drum sizes down to 3" width are available as well as special pic count drums for low torque or smooth cut applications.
