

MINI SKID STEER PLANER MP SERIES

Hydraulic roll-in depth control — The patented roll-in depth control allows the operator to easily change the depth of cut without removing his hands from the controls. The operator controls the depth utilizing the mini skid steer's existing bucket function.

High torque direct drive design — These motors deliver the power directly to the cutting disc. No power is lost through a planetary reduction system. A wide selection of motors is available to maximize the productivity of your mini skid steer.

Open-drum design — The exclusive open drum design improves planer productivity by greatly reducing the power loss caused by the pics and drum passing through the already planed material. Standard planing drums lose power, particularly at depths below 1-1/2" because material is trapped between the pics and the drum. The open-drum design overcomes this problem giving you increased productivity.

Specifications

Model	MP-75	MP-150	MP-225	MP-300
Cutting Width	3"	6"	9"	12"
Cutting Depth	4"	4"	4"	4"
Shipping Weight (lbs.)	350	360	375	405
Minimum HYD. HP Recommended	10	10	18	18
Minimum Engine HP	13	13	20	20
# Teeth	12	20	28	36

Front down design — Front down design keeps the front of the planer on the ground during operation to eliminate the throwing of debris.

Skid steer mount — The Universal mini skid steer mount allows the use of the planer on most mini skid steer models. Hands free operation of the depth control requires no additional hydraulic systems to operate.

Standard manual tilt — Standard manual tilt allows you to tilt the planer to blend surfaces or make taper cuts.

Optional offset mount — Optional two position mount allows milling next to curbs or edges of the road.

Applications

Small milling projects — Projects that require maneuverability or are in hard to reach areas are the specialty of the mini skid steer planer.

Residential — Small repairs in backyard areas where access is restricted or where weight or lawn disturbance is a factor.

Municipal — Great for pothole repair, bike paths, walking trails or parks where a small sized planer is required.
